

Black & Grey Water tanks

Ozone treatment in order to prevent bad smells coming from the air vents.

Elimination of bad odours

This is achieved by means of shock treatment with Ozone, which eliminates bad smells such as cooking and cigarette smoke from carpets and curtains in kitchens, store rooms and other areas.

Crew, guest and owner's staterooms

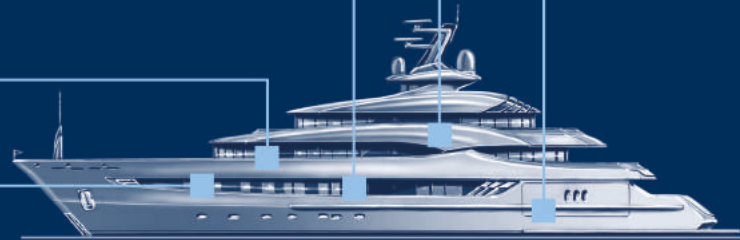

Ozone treatment for the complete eradications of the bacteria charges, mould and viruses.

Disinfection of fan coils

Ozone sanitization of the entry ducts and of the condensation collecting basin.

Store rooms and fridges

The Ozone process eliminate bad odours and slows down the deterioration of food.

Ozone Treatment

What We Do

Clearvac utilise the Ozone Technology as a natural method of disinfection of internal spaces such as cabins, common and working areas.
Odour control in ACC spaces including Galley.
Disinfection of air conditioning.

What We Achieve

Eradication of bacteria, bed bugs, and viruses.

Why Use Clearvac

Ozone is totally green technology. It is effective for sanitising mattresses and furniture in any of the on board vital spaces and recognised by Italian Board of Health and U.S. FDA Federal Register.

What We Achieve

Certification, compliance & quality clean air supply.

Why Use Clearvac

Clearvac provide the highest standards in the Superyacht market.

PRINCESS TOO

31st July 2012

STP Palma de Mallorca, Spain

To whom it may concern,

It has been my pleasure to have employed Clearvac International aboard Motor Yacht Princess Too. Dave and his team were very professional in their approach to the project with very thorough explanations of what would happen and when.

It was most important to me that the project could be carried out without any disruption to the use or daily running of the yacht, this was achieved with apparent ease.

The results speak for themselves, our on-board vacuum pipework had narrowed significantly due to the build-up of scale etc... and upon completion of the works the system looked as new! And at no point was the toilet system of the yacht out of use or compromised in any way.

I can only thoroughly recommend Clearvac International, and their product, and I shall be using them again. A rare find in the yachting sector, a cost effective solution to an everyday problem that works. Not only are we delighted with the result, the team who carried out the work were clean tidy and a pleasure to have aboard. I cannot recommend them more highly.

Yours sincerely

Graeme Riddle
